

e-DIAGNOSTIC

ACCESS ADVANCED SETTINGS

The Diagnostics Remote is an essential tool for installers working regularly with e-Loop systems, providing fast, wireless access to advanced configuration and diagnostic features. Designed for ease of use in the field, the remote allows users to view real-time data, adjust performance variables, and troubleshoot with confidence. Once placed on top of an e-Loop and connected, it delivers near-instant feedback, enabling live monitoring and fine-tuning without the need for direct access or disassembly.

Features

- Dual Channel
- Wireless Connection to any e-Loop
- Real-Time Data Transmission for Live Diagnostics
- Adjust Trip Level Thresholds
- Fine-Tune Sensitivity per Axis (X/Y)
- Calibrate e-Loop Devices On-Site
- Change Operational Modes with Ease
- Scan for Background RF Interference
- Simple One-Touch Connection Process
- User-Friendly Menu Navigation
