e-KEYPAD

ELEGANT ACCESS CONTROL

The e-Keypad offers stylish and secure access control solution, ideal for applications requiring multiple user codes. Designed for flexibility and ease of use, it supports up to 200 individual PIN codes, making it perfect for shared or high-traffic entry points. With three separate channels, users can trigger different operations from a single keypad. Installers and supervisors also benefit from advanced configuration options to tailor functionality to the site's specific needs.
