

# e-LOOP

**Wired | Presence & Exit**  
AVAILABLE WITH ADDED RADAR PROTECTION

## Wired Vehicle Detection System

Introducing a new concept in wireless vehicle detection by Microtech Designs. The new Post Mount e-Loop offers all the advanced technology of a traditional induction loop, with a uniquely unobtrusive form factor, featuring dual sensors tech for consistent & reliable detection.

### Installation in 3 Simple Steps

- ① Wire the **e-Loop** to your gate controller
- ② Secure the **e-Loop** to the driveway
- ③ Calibrate the **e-Loop**... and you're ready to operate in less than 15 minutes.

Swap traditional induction loops for the easy installation and advanced reliability of an e-Loop.

### Kit Contents

- 1 x e-Loop Wired Detection Module
- 2 x Fixing Screws

### Features

- Dual Sensor Tech: Magnetic field & Radar detection
- Quick and easy installation
- Compact profile
- Seamless & Simplistic battery replacement
- Durable Waterproof Design
- 3 x Modes: Presence, Exit & Parking
